

# Zachary Mariskanish

(412) 217-8220 | [ZMWorkCyber@proton.me](mailto:ZMWorkCyber@proton.me) | [zmariskanishportfolio.netlify.app](https://zmariskanishportfolio.netlify.app)

## Objective

Cybersecurity professional with hands-on experience in risk engineering, vulnerability analysis, penetration testing, and automation. Strong background in CVE analysis, dark web monitoring, API integrations, and security reporting. Experienced supporting mid-market and enterprise organizations (\$250M–\$1B revenue). CompTIA Security+ certified.

## Education/Certifications

- **COMPTIA Security+:**
  - *March 2024*
- **Robert Morris University:**
  - Bachelor of Science in Cyber Forensics and Information Security, Graduated December 2020

## Professional Experience

### Cybersecurity Analyst:— Cowbell

February 2024 - Present

- Performed dark web monitoring and aggregation, delivering reports within 1–2 business days
- Research and assess CVEs using threat intelligence to identify actively exploited or high-risk vulnerabilities, delivering concise reporting to customers to support timely risk-based alerting and decision-making
- Conducted authorized micro penetration tests (external, limited scope) with remediation reporting
- Consulted with \$250M–\$1B revenue organizations on cybersecurity best practices
- Configured API integrations across Microsoft 365, AWS, Google Workspace, Cloudflare, and Sophos
- Led a development for a team metrics database and executive reporting dashboards (Tableau and Salesforce)
- Created automation of real-time cyber risk ratings based on internet-facing assets using Dark Web Data

### Risk Administrator, Cowbell Cyber

April 2022 -February 2024

- Managed request inbox and meeting queue, ensuring timely response and resolution
- Aggregated risk engineering metrics (call volume, engagement type) for leadership reporting
- Supported policyholders with platform onboarding, API connector setup, and security awareness training
- Produced weekly vulnerability and Spotlight reports on emerging threats
- Authored vulnerability summaries and determined alerting vs. direct notification strategy
- Built API adoption reports and maintained policyholder technology stack data
- Researched and summarized industry threat intelligence (Verizon DBIR, IBM Threat Report)

## Technical Skills:

- Application Security/Risk Assessment/Incident Response
- Common Vulnerabilities and Exposures (CVE) analysis/Malware analysis
- Ethical Hacking
- Network Traffic Analysis, Detection And Response
- Automating Technical Report Writing
- Various Cyber Forensics Tools:
  - Sleuth Kit (TSK) for analysis, EaseUS (data recovery), Wireshark for network traffic, FTK Imager for data acquisition, Autopsy or FTK Imager for Recovering deleted files
- CLI and adaptable to most common computer languages
- AWS API Configuration/Cloud Management
- GDPR & HIPAA compliance
